

Weather forecast

Today it is mostly sunny. The temperatures are around 61°F in the morning and 79°F in the afternoon.

Poem of the day

Believe in what really feels right for you.

Thun City of the Alps

The old town area of Thun mainly arose in the 12th century, when Berchtold V. of Zähringen built Thun Castle and extended the city around today's Hauptgasse. The unique high pavements that characterise the upper part of the Hauptgasse are worth a visit for their unique architecture alone.

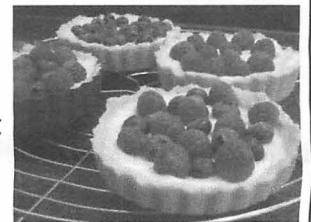

Sweetie of today

Our confectionery recommends fresh:

Wild berry tartlets

along with other homemade cakes and pastries, together with a Schweizerhof-coffee with whipped-cream and cream of Cacao.

Aareschlucht

Welcome to an exciting natural adventure. The Haslital, one of the large valleys in the central alps, stretches from the Grimsel Pass to the Lake of Brienz. The flat valley floor of the lower Haslital is separated from the upper valley by a transverse rock formation. This rock formation is called the "Kirchet" and lies between Meiringen and Innertkirchen. Over thousands of years, the Aare River eroded a path through this rock formation resulting in a gorge which is 4'593 feet long and up to 590 feet deep. This gorge has been accessible for over 100 years by a system of safe paths and tunnels. The walk through the gorge is a very special way to experience nature.

Mountain Biking

The 524'934 ft of mountain bike trails in the Jungfrau Region do require a certain level of fitness - but thankfully there are always trains and cable cars which can take the strain out of many climb. The view of the Eiger, Mönch and Jungfrau is spectacular.
